

STRUCTURE

45 degree gusset

90 degree flat gusset

90 degree vertical gusset

cross gusset

L gusset

arc gusset

hinge

90 degree corner gusset

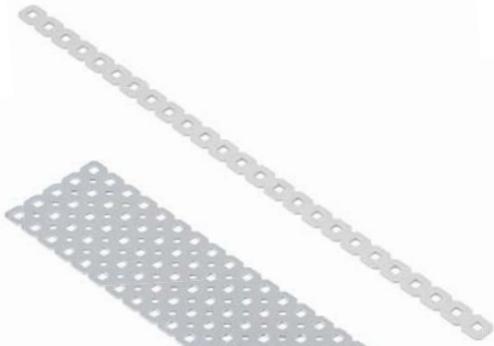

L coupler

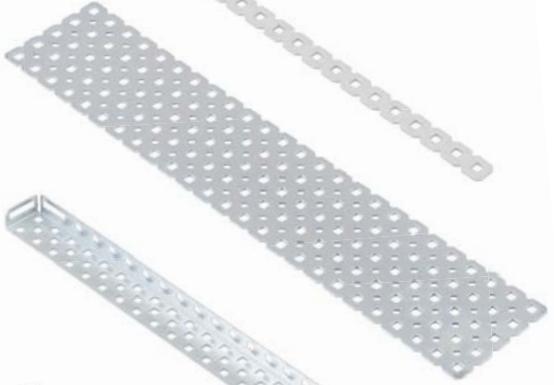

C coupler

1x25 bar

5x25 plate

1x2x25 rail

1x2x35 rail

2x2x35 L

3x3x35 L

1x2x1x35 C

1x3x1x35 C

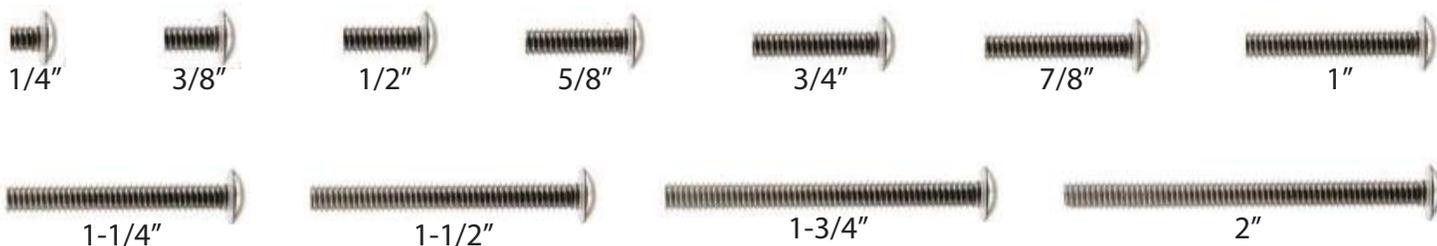

1x5x1x35 C

Main structural members shown in their maximum available length.  
 Units are the number of 1/2"-spaced holes per face.  
 At the VEX store, rails are steel, all other members are aluminum.  
 McCallum has many of these in steel.  
 For modularity cut members in 5 unit increments when possible.

# FASTENERS, SPACERS and WRENCHES

8-32 screws with 3/32 hex head.  
Used for all structural connections,  
can be black or silver.

8-32 keps nut  
8-32 nylock nut

open wrench with  
1 1/32" end (nuts)  
1/4" end (standoffs)

3/32" hex wrench

1/2" standoff  
1" standoff  
2" standoff

aluminum standoffs with 8-32 threaded ends  
also available at: 1/4", 3/4", 1-1/2", 2-1/2", 3", 4", 5", 6"

8-32 coupling screws  
with 5/64 hex head  
(used to join standoffs)

8-32 set screw  
with 5/64 hex head  
(for standard  
shaft collar)

6-32 screws with 5/64 hex head.  
Only used for motor and rack connections,  
can be black or brass.

5/64" hex wrench

8-32 rubber link

# WHEELS

2.75" traction

2.75" omni,  
allows smooth turning for  
drives with more than 2 wheels

1.5" intake roller

3.25" traction  
1/4" center for HS shaft  
or inserts

3.25" omni  
1/4" center for HS shaft  
or inserts

5" traction

4" traction

4" omni

4" traction

4" mecanum,  
allows strafing drive

6" leg,  
for rugged ground

# GEARS

Standard gears,  
each gear is 24 teeth larger,  
ratio to 12 in ( )

12T (1)

36T (3)

60T (5)

84T (7)

High strength gears,  
center holds inserts or 1/4" drive shaft

84T (7)

60T (5)

36T (3)

12T (1)

Other gears

bevel gear

rack gear

worm gear

worm wheel

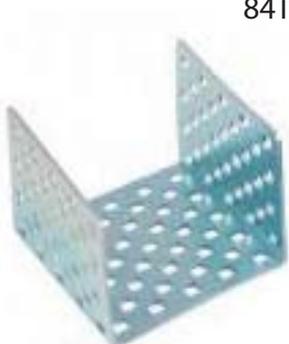

round insert

square insert

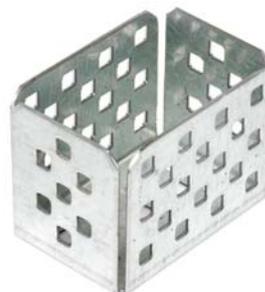

differential frame

Pulley gearbox

Rack gearbox  
also holds main battery well

Worm gearbox

Bevel gearbox

# SPROCKET, CHAIN, and TREAD

High strength sprockets,  
each sprocket is 6 teeth larger  
ratio to 6 in ( )

6T (1)

12T (2)

18T (3)

24T (4)

30T (5)

High strength chain

Attachment links

Tread

Specialty treads

Tread sprocket (18 teeth)

Tread guides

# DRIVE SHAFT RELATED ITEMS

standard drive shaft, 1/8" square  
can be purchased in 2", 3", 4" and 12"  
or cut to length

bar lock  
alligns shaft at 90 degrees  
to structure

adjustable bar lock  
center can be set at  
many angles

rubber shaft collar  
secures to shaft by  
friction alone

standard shaft collar  
secures to shaft with  
8-32 set screw using  
5/64 hex wrench

clamping shaft collar  
secures to shaft with  
8-32 screw and  
nylock nut

universal joint

shaft coupler

clutch

shaft bearing

shaft bearing, flat

bearing rivet  
quickly connects  
flat bearing to structure

high strength drive shaft, 1/4" square  
can be purchased in 2", 3", 4" and 12"  
or cut to length

HS clamping collar

HS bearing, flat

HS spacers

# MOTORS and SENSORS

393 motor

refurb gears

standard gears  
100 rpm

speed gears  
160 rpm

turbo gears  
240 rpm

393 motor with encoder back, counts motor rotations, allows PID control

optical shaft encoder, counts shaft rotations

potentiometer, senses shaft angle

gyroscope, senses rotation in the plane of its base

accelerometer, senses X, Y and Z acceleration

LED indicator, red, yellow or green

limit switch, very sensitive

bumper switch, requires more force

jumper, acts as pressed button

LCD display, connects to UART port with a special cable

ultrasonic sensor, detects distance

line tracker, typically used in sets of three

light sensor, detects light intensity, not useful in competition

speaker module

# POWER and CONTROL

Cortex microcontroller, ARM cpu with multiple I/O ports, stores and runs programs

VEXnet joystick, four button groups, two joystics

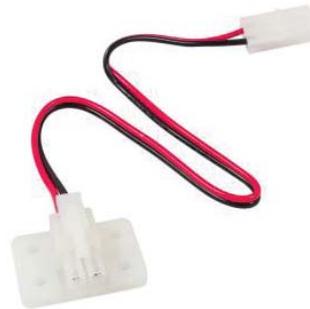

VEXnet key, NOT a usb drive, but a 2.4GHz transmitter/receiver

main battery, 7.2V, 3000mah

main battery clamp

main battery extension wire

power expander, allows two main batteries

9V backup battery wire and holder

MC29 motor controller wire, used in ports 2-8

wire clip, holds ends together

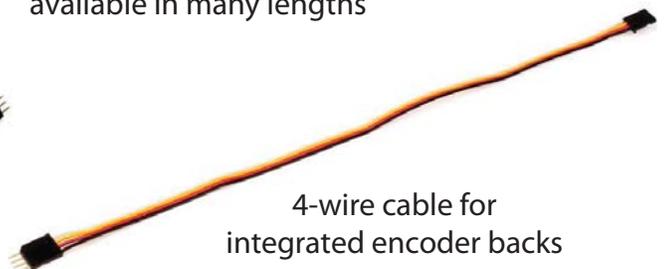

2-wire extender, available in many lengths

3-wire Y splitter, allows two motors to run from one port

3-wire extender, available in many lengths

4-wire cable for integrated encoder backs
