

# CAN YOU SPARE A PART?

**The VEX World Coaches Association is helping a start-up VEX Robotics Program in Colombia by “crowd-funding” a VEX Robot.**

**Jimmy Garcia, the coach of Colombian team 6921D, is taking robotics education to young victims of the armed conflict in his country. VEX parts are very expensive to import to Colombia (it \$1700 USD to buy a Classroom & Competition Superkit). We are working with Dr. Monica Sanchez of the Fundación Global to ensure all donations get to Colombia.**

**Donations of spare parts (and money) are being received at the VEX-U pit of MCCC, of VEX Team 3547: VIRUS**

**Any money received will be used to purchase high-cost components (cortex, controller, etc) and for shipping to Colombia.**

**Questions: Contact Mike Mohn of VEX Team 3547: VIRUS at 734-652-2127 (cell)**

**Mentors/Coaches: Please join the VEX World Coaches Association on Facebook!**
